Privacy Policy

What makes it so safe?

Technology is secure and stable: The software we use in the order compartment of our system (SSL) is the standard for this industry. All of the major browsers support it and promote how well it works at their web sites and in their software. The software takes the data that you provide and encrypts it in a special coding system that can only be interpreted by our system in our office. This system is actually safer than giving it out over the telephone or sending a fax.

All the big guys are using the same software: Companies like Amazon.com, AT&T, Dell Computers, etc. are using the same software. They have millions of customers who safely shop without experiencing credit card fraud. Since we started, we have had thousands of customers order without any credit card fraud at all. You can feel comfortable that the same precautions taken at the big companies are being taken here to ensure your card's safety.

Still rather not use your card on the internet?

That's fine. Just give us a call at (520)624-8111 in order to arrange for an alternative form of payment.
